Form for reporting a compensable injury

PART I. SUMMARY OF THE STATISTICS

Comment by Mr J. E. Dulley, Deputy Commonwealth Statistician

and Government Statistician of New South Wales

The detailed statistical tables relating to workers' compensation in the year ended 30 June 1981, as shown in Part II of this bulletin, have been compiled by the Australian Bureau of Statistics. They are derived from returns which insurers (including self-insurers) have supplied to the Workers' Compensation Commission in respect of injuries for which claims have been submitted. Injuries compensable under the Workers' Compensation Act comprise:-

- (a) injuries arising out of or in the course of a worker's employment whether received at or away from his place of employment;
- (b) diseases which are contracted or aggravated in the course of a worker's employment and to which the employment was a contributing factor;
- (c) injuries received by a worker on the journey between his residence and place of employment or on other prescribed journeys; and
- (d) injuries sustained by a worker whilst temporarily absent from his place of employment during an ordinary recess period.

Although the statistics provide a satisfactory record of cases (excluding cases of less than three days incapacity) under the Workers' Compensation Act, they do not provide a complete record of all industrial accidents to workers in New South Wales. They exclude the following: -

- Injuries which did not result in incapacity for work for at least three days.
 Although such injuries have been compensable since 20 December 1948 it has been practicable to obtain only limited statistics relating to number of cases and payments of compensation.
- 2. Injuries for which no claim was made under the Act.
- 3. Injuries sustained by workers to whom the provisions of the Workers' Compensation Act do not apply. Such workers include most self-employed persons, employees of the Australian Government, and certain groups of employees specifically excluded from the Act (e.g. the police, and casual workers employed for one period only of not more than five working days and who are employed other than for the purpose of the employer's trade or business).
- 4. Cases of disease caused by the inhalation of dust (except in coal mining), for which provision for compensation is made under other Acts.

In Part I, the statistics are reviewed in three sections. Section A surveys the number of new cases of compensable injury reported; Section B gives particulars of the duration of weekly payments and average amount of compensation per case in respect of cases terminated; and Section C shows the amount of compensation paid. As the compensation paid in a particular year includes payments in respect of cases reported in earlier years and excludes payments yet to be made on claims not finalised by the end of the year, the compensation payments during a year cannot be related to the compensation cases reported in that year. Particulars of the average amount of compensation per case terminated in the year 1980-81 (irrespective of when the case was first reported) are given in Table 13 of Part I.

Where figures shown in this bulletin have been rounded, discrepancies may occur between sums of the component items and the totals shown.

SECTION A. NEW CASES OF COMPENSABLE INJURY REPORTED

The returns of compensation cases received for tabulation each year comprise all cases for which payments were made in the year and unfinalised cases for which no payments were made in the year. In many cases payments begin and end in the one year, but in a number of cases payments overlap from one year to another and in some instances continue for a number of years. New cases, i.e. those originating in the current year, can be distinguished from those carried forward from the previous year but a minor degree of subjective judgement is necessary in deciding whether an unfinalised case (particularly if no payment has been made by the end of the year) will ultimately prove to be compensable or will involve at least three days of incapacity.

New cases classified as fatal, permanent total disability, and permanent partial disability cases are according to the result of the accident as known by the insurer at the time of completing the return in respect of that accident. Fatal cases, for example, include cases where an employee has subsequently died as a result of injuries received at work, as well as cases where an employee is killed at work. Compensable cases are ascribed to "injury by disease" where :-

- (a) the ascribed cause of the "injury" is slow and protracted in nature; and/or
- (b) the "injury" is ascribed to the repeated or continuous action of a mechanical, physical, or chemical cause - it is not due to a single event, but to a cause, acting imperceptibly and constantly; and/or
- (c) the person "injured" probably had some degree of pre-disposition to the development of the pathological conditions causing the injury.

The classifications used for tabulating injuries and the causes of these injuries are based on those recommended for adoption by the Tenth International Conference of Labour Statisticians. Injuries by accident are classified according to <u>cause</u>, <u>nature</u> (e.g. fracture, dislocation, etc.), and <u>location</u> (e.g. eye, nose, etc.) of the injury. Causes of injury are classified according to :-

- (i) the type of accident (defined as the type of event which directly resulted in the injury, i.e. the manner in which the object or substance causing the injury enters into contact with the injured person); and
- (ii) the <u>agency</u> causing the accident (defined as the machine, means of transport, equipment, substance, working environment, etc. which, because of its hazardous nature or condition, precipitated the event).

Particulars of new compensation cases reported during the years ended 30 June 1976 to 1981 are shown in the following table:-

TABLE 1. NEW COMPENSATION CASES REPORTED. 1975-76 TO 1980-81 (Excluding cases of less than three days' incapacity)

		Inj	ury by accident (a)	_

1980	1,965	3,791	14,756	18,547	20,512	
1981	2,382	4,027	16,438	20,465	22,847	
		ALL WO	RKERS			
1976	5,872	11,322	113,869	125,191	131,063	
1977	6,593	10,745	104,792	115,537	122,130	
1978	8,710	10,770	105,644	116,414	125,124	
1979	10,160	10,521	105,200	115,721	125,881	
1980	13,703	10,786	108,972	119,758	133,461	
1981	14,761	12,023	117,396	129,419	144,180	

- (a) See text preceding table.
- (b) As prescribed in section 7(1), paragraphs (c) and (d) of the Workers' Compensation Act.
- (c) Includes cases arising out of a worker's employment, and injuries sustained by a worker whilst temporarily absent from his place of employment during an ordinary recess period.

Amongst male workers, 83 per cent of the new cases reported in 1980-81 involved injuries by accidents in the course of employment etc., 7 per cent involved injuries received on periodic or other prescribed journeys, and 10 per cent were attributed to disease. For female workers, the corresponding proportions were 72, 18, and 10 per cent - reflecting the smaller proportion of females employed in the more hazardous occupations and the higher proportion of females injured whilst travelling to and from work.

The new compensation cases covered in Table 1 included the following fatal cases:-

TABLE 2. NEW COMPENSATION CASES REPORTED, 1975-76 TO 1980-81 : FATAL CASES

(Excluding cases of less than three days' incapacity)

		Male (workers			Female			
Year ended 30 June	Injury	Injury by accident (a)			Injury	•	ry by ent (a)		Total

1981	61	82	158	301	3	12	3	18	319

- (a) See text preceding Table 1.
- (b) As prescribed in section 7(1), paragraphs (c) and (d) of the Act.
- (c). See footnote (c) to Table 1.

INJURIES ON PERIODIC OR OTHER JOURNEYS

Only a small proportion of the new compensation cases reported in a year involve injuries received on the journey to or from employment, or on the other journeys prescribed in section 7(1), paragraphs (c) and (d) of the Workers' Compensation Act. The agency of accident in journey cases reported for the first time in 1980-81 is shown in Table 3 on page 8.

TABLE 3. NEW COMPENSATION CASES REPORTED, 1980-81 : AGENCY OF ACCIDENT -

PERIODIC OR OTHER JOURNEY (a) CASES

(Excluding cases of less than three days' incapacity)

		Male workers		Female workers			
Agency of accident (b)	Fatal	Non-fatal	Total	Fatal	Non-fatal	Total	
Means of transport –							
Rail transport	. 2	92	94	_	48	48	
Motor vehicles	76	4,938	5,014	11	1,967	1,978	
Other	2	261	263	-	38	38	
Traffic surfaces	-	2,012	2,012	-	1,703	1,703	
Other agencies	2	611	613	1	259	260	
Total	82	7,914	7,996	12	4,015	4,027	

- (a) As prescribed in section 7(1), paragraphs (c) and (d) of the Act.
- (b) See text preceding Table 1.

In 1980-81, means of transport was the agency of accident in respect of 67 per cent of the new cases of injuries to male workers on prescribed journeys (motor vehicles, 63 per cent; rail transport, 1 per cent; and other means of transport, 3 per cent), while traffic surfaces was the agency in respect of 25 per cent of the cases. For female workers, the proportions were: means of transport, 51 per cent (including motor vehicles, 49 per cent), and traffic surfaces, 42 per cent. There were 82 fatal cases among male workers and 12 fatal cases among female workers in this year.

INJURIES IN VARIOUS INDUSTRIES

The "classification of employment" shown in Table 4 on page 9 (and used elsewhere in this bulletin) is prescribed by Regulations under the Workers' Compensation Act for use by insurers in compiling returns of injuries. This classification is not directly comparable with any classification adopted for the compilation of official statistics regarding industries or occupations of employees.

Cases of disease caused by inhalation of dust (except in coal mining) are excluded. Provision for compensation in these cases is made by special legislation, and they are not taken into consideration in reviewing operations under the principal Workers' Compensation Act.

In the transport group, cases relating to employees in government transport services are included if compensation is claimed under the Workers' Compensation Act. Injuries compensated in terms of the Government Railways or Transport Acts are excluded.

TABLE 4. NEW COMPENSATION CASES REPORTED, 1980-81 : CLASSIFICATION OF EMPLOYMENT (excluding cases of less than three days' incapacity)

⁽a) As prescribed by Regulations under the Workers' Compensation Act

New cases of compensation of male workers reported in 1980-81 were most numerous in metals and machinery manufacturing (32,388), followed by construction, maintenance, etc. (15,961), wholesale, retail, etc. (10,829), food and drink manufacturing (10,338), mining (9,922), transport (7,176), building (6,674), and agricultural, horticultural etc. (4,747); these classes accounted for 81 per cent of all new cases reported for males.

Amongst female workers, new compensation cases occurred mainly in personal service (4,516), professional, etc. (4,474), wholesale, retail, etc. (3,004), metals and machinery manufacturing (2,620), food and drink manufacturing (2,096), domestic and home services (1,284), clothing, etc. manufacturing (1,266), and miscellaneous manufacturing (891); these classes accounted 88 per cent of all new cases reported for females.

AGES OF INJURED MALE WORKERS

Particulars of the ages of male workers involved in new compensation cases reported in each of the last six years are given in the following table:-

TABLE 5. NEW COMPENSATION CASES REPORTED : AGES OF INJURED MALE WORKERS

(Excluding cases of less than three days' incapacity)

Age group (years)	1975-76	1976-77	1977-78	1978-79	1979-80	1980-81
Under 20	11,437	10,766	11,314	11,781	12,331	13,968
20 to 24	17,228	15,687	16,195	16,715	17,870	19,907
25 to 29	15,911	13,970	13,888	13,696	14,489	15,457
30 to 34	12,731	12,189	12,730	12,897	13,186	14,355

50 to 54	8.3	8.6	8.7	8.7	8.7	8.5
55 to 59	6.2	6.5	6.7	7.0	7.4	7.0
60 or more	4.5	4.6	4.7	4.7	4.8	4.3
Total	100.0	100.0	100.0	100.0	100.0	100.0

⁽a) Excluding those with age not stated.

Tables V and VI of Part II show, for 1980-81, the age distribution of the male workers grouped according to classification of employment and agency of accident, respectively.

In 1980-81, cases involving male workers under 40 years of age accounted for 63 per cent of new compensation cases involving male workers (excluding those cases where the age was "not stated"). The proportion for this age group was highest in wholesale, retail, etc. (72 per cent) and lowest in professional, etc. (53 per cent).

In the metals and machinery class of employment, where new compensation cases were most numerous, the age distribution of male workers involved in new cases (excluding those cases where the age was "not stated") in 1980-81 was: under 20 years, 13.8 per cent; 20 to 24 years, 17.8 per cent; 25 to 29 years, 11.4 per cent; 30 to 34 years, 10.3 per cent; 35 to 39 years, 8.9 per cent; 40 to 44 years, 8.6 per cent; 45 to 49 years, 7.8 per cent; and 50 years and over, 21.4 per cent. In the mining and mineral treatment, quarrying class, the proportions in the respective age groups were 3.1 per cent; 11.6 per cent; 15.5 per cent; 16.5 per cent; 13.1 per cent; 11.4 per cent; 9.3 per cent; and 19.5 per cent.

AGENCY OF ACCIDENT

The new accident compensation cases reported in 1980-81 are classified by the major groupings of agency of accident in the next table :-

TABLE 7. NEW COMPENSATION CASES REPORTED, 1980-81:

ACCIDENT CASES CLASSIFIED BY AGENCY OF ACCIDENT

(Excluding cases of less than three days' incapacity)

	No.	umber of ca	ases	Prop	Proportion of total			
Agency of accident (a)	Male workers	Female workers	All workers	Male workers	Female workers	All workers		
	<u> </u>			per cent	per cent	per cent		
Machines	9,687	1,163	10,850	8.89	5.68	8.38		
Means of transport and lifting equipment	17,502	3,001	20,503	16.06	14.66	15.84		
Other equipment	24,751	3,961	28,712	22.72	19.36	22.18		
Materials, substances, and radiations	22,736	1,940	24,676	20.87	9.48	19.07		
Working environment	21,024	6,133	27,157	19.30	29.97	20.98		
Crates and other containers	7,231	1,747	8,978	6.64	8.54	6.94		
Other specified agencies	4,523	2,213	6,736	4.15	10.81	5.20		
Agencies not classified for lack of sufficient data	1,500	307	1,807	1.38	1.50	1.40		
Total, all agencies of accident	108,954	20,465	129,419	100.00	100.00	100.00		

⁽a) See text preceding Table 1.

Further particulars of agency of accident are given in Tables IV, VI, VII, IX, and X of Part II. In these tables, the major groupings of agency of accident, which are shown in Table 7, are classified by type of machine, means of transport, etc.

TYPE OF ACCIDENT

The new accident compensation cases reported in 1980-81 are classified by type of accident in the next table:-

TABLE 8. NEW COMPENSATION CASES REPORTED, 1980-81

ACCIDENT CASES CLASSIFIED BY TYPE OF ACCIDENT

(Excluding cases of less than three days' incapacity)

	1	Number of c	ases	Proportion of total		
Type of accident (a)	Male workers	Female workers	All workers	Male workers	Female workers	All workers
				per cent	per cent	per cent

(a) See text preceding Table 1.

In Table X of Part II, the new accident compensation cases reported in 1980-81 are classified by type of accident and agency of accident. The principal types of accident to male workers in 1980-81 were: stepping on, striking against, or struck by objects (excluding falling objects), 36,282 cases (33.30 per cent); over-exertion, strenuous, etc. movements, 26,088 cases (23.94 per cent); falls of and jumps by persons, 17,793 cases (16.33 per cent); and struck by falling objects, 8,650 cases (7.94 per cent). Accidents of the type stepping on, striking against, or struck by objects (excluding falling objects) were precipitated by tools and implements (excluding electric hand tools) in 6,735 cases (18.56 per cent); "other materials, substances, and radiations" in 5,476 cases (15.09 per cent); and traffic and working surfaces in 4,887 cases (13.47 per cent). Where the worker fell or jumped, the agency of accident was traffic and working surfaces in 8,552 cases (48.06 per cent) and trucks and other motor vehicles in 2,516 cases (14.14 per cent). In accidents of the type over-exertion, strenuous, etc. movements, the principal agencies of accident were: "other materials, substances, and radiations", 8,082 cases (30.98 per cent); crates and other containers, 4,867 cases (18.66 per cent); and other tools and implements, 2,050 cases (7.86 per cent).

The principal types of accident to female workers in 1980-81 were: over-exertion, strenuous, etc. movements, 5,559 cases (27.16 per cent); stepping on, striking against, or struck by objects (exceeding falling objects), 5,193 cases (25.38 per cent); and falls of and jumps by persons 4,784 cases (23.38 per cent).

NATURE AND LOCATION OF INJURIES (ACCIDENT CASES)

The nature and location of the injuries by accident sustained by male workers involved in new compensation cases reported in 1980-81 are summarised in Table 9 on page 14. Where more than one injury is sustained in an accident, the case is classified to the most severe injury. In reporting the nature of injury, particularly in cases where amputation or enucleation results, the result, as known at the time of completing the return in respect of the accident, may be reported instead of the nature of the original For example, where an employee's leg is crushed in an accident and subsequently amoutated, the nature of injury may be reported as amputation of leg instead of crushed leg. This should be borne in mind in interpreting the figures. The greatest number of injuries to male workers are in the nature of sprains and strains. In 1980-81, these represented 40 per cent of total injuries caused by accident, while lacerations and open wounds represented 19 per cent, contusions and crushings represented 16 per cent, and fractures represented 10 per cent. Injuries to upper limbs were more numerous than injuries to other parts of the body; they numbered 37,685 and included 14,094 cases of lacerations and open wounds, 7,870 cases of sprains and strains, 6,753 cases of contusions and crushings, and 4,945 cases of Amputations numbered 395; most of these involved loss of a finger or joint thereof, but in fractures. 6 cases a hand and in 13 cases a leg or foot, was amputated. There were 3 cases of enucleations of an Cases of concussion and internal injury of the brain numbered 422; fractures of the skull, 122, fracture of the nose, 150, and superficial injury to the eye (mainly due to foreign bodies entering the eye), 2,777. Injuries to the trunk included strained back, 19,848, fracture of chest or ribs, 815, and hernia, 1,599.

INJURIES BY DISEASE

Compensable cases of injuries by disease are classified according to the Eighth Revision of the International Classification of Diseases, Injuries, and Causes of Death.

Particulars of the classification to which new compensable disease cases reported in 1980-81 were assigned, are given in Table 10 on page 15.

(a) See text preceding Table 1.

Table XI of Part II shows new compensable disease cases in 1980-81 classified according to the nature of disease and classification of employment. Amongst males, the diseases to which the greatest numbers of "injury by disease" cases were assigned were industrial deafness, 9,154 cases (73.95 per cent), and dermatitis, 985 cases (7.96 per cent). Fifty per cent of the cases of industrial deafness occurred in the metals, machinery manufacturing, etc. class of employment, but cases of dermatitis were spread throughout all classes.

Amongst male workers, the largest number of cases of dermatitis in any industry class was 256 in the metals, machinery manufacturing, etc. class (accounting, however, for only 5 per cent of all "injuries by disease" in this industry class).

SECTION B. COMPENSABLE INJURY CASES TERMINATED

DURATION OF COMPENSATION

Particulars of the duration of compensation in cases compensated by weekly payments, and in respect of which no lump sum payments were made, are given in the next table. These particulars relate to cases <u>terminated</u> during 1980-81 and not (as in preceding tables) to new cases reported in the year. For cases terminated in 1980-81, the average duration was 3.7 weeks for male workers and 3.9 weeks for female workers.

TABLE 11. COMPENSATION CASES TERMINATED IN 1980-81 : DURATION OF WEEKLY PAYMENTS

(Excluding cases of less than three days' incapacity)

Duration of	Cases t	erminated	Proportio	on of total
weekly payments	Male workers	Female workers	Male workers	Female workers
Under 1 week	24,163	4,315	per cent 25.61	per cent 24.74
1 week and under 2 weeks	31,967	5,667	33.88	32.49
2 weeks " " 3 weeks	12,699	2,412	13.46	13.83
3 weeks " " 4 weeks	6,417	1,173	6.80	6.72
4 weeks " " 8 weeks	11,167	2,084	11.84	11.95
8 weeks " " 12 weeks	3,731	774	3.95	4.44
12 weeks " " 24 weeks	2,850	666	3.02	3.82
24 weeks " " 36 weeks	665	172	0.70	0.99
36 weeks " " 52 weeks	253	94	0.27	0.54
52 weeks " " 78 weeks	181	33	0.19	0.19
78 weeks or more	256	51	0.27	0.29
Total cases terminated	94,349	17,441	100.00	100.00

In respect of male workers, the duration of weekly payments was less than two weeks in 59.5 per cent of the weekly payment cases terminated in 1980-81 and less than eight weeks in 91.6 per cent of such cases. For female workers, the proportions were 57.2 per cent and 89.7 per cent, respectively.

Table 12 on page 17 shows, for cases compensated by weekly payments, the average duration of cases terminated in 1980-81 in each class of employment. The average duration for male workers was greatest (5.9 weeks) in professional (including clerical and administrative), and least (3.0 weeks) in food and drink manufacturing and plastics manufacturing.

TABLE 12. COMPENSATION CASES TERMINATED IN 1980-81

CLASSIFICATION OF EMPLOYMENT AND AVERAGE DURATION OF WEEKLY PAYMENTS

(Excluding cases of less than three days' incapacity)

Classification of employment (a)	Average duration	of weekly payments
	Male workers	Female workers

all classifications of employment	3.7	3.9

⁽a) As prescribed by Regulations under the Workers' Compensation Act.

AVERAGE AMOUNT OF COMPENSATION

Particulars of the average amount of compensation per case in respect of all compensation cases terminated during 1980-81 are given in Table 13 on page 18. These particulars cover all payments (irrespective of the year of payment) in respect of cases which involved the death of an employee or the incapacity of an employee for three or more days.

TABLE 13. COMPENSATION CASES TERMINATED IN 1980-81: AVERAGE AMOUNT OF COMPENSATION PER CASE

(Excluding cases of less than three days' incapacity)

	Aver	cage amount of compensa	tion
Particulars	Male workers	Female workers	All workers
Fatal cases	\$ 17,888.96	\$ 7,567.58	\$ 17,351.79
Disability cases compensated by -			
Lump sum settlement	7,487.84	19,445.83	8,583.54
Weekly payments -			
Workers and dependants	636.30	575.07	626.75
Medical treatment (a)	212.78	213.13	212.83
Total	849.08	788.20	839.58
ll cases	1,550.20	1,854.84	1,595.83

⁽a) Includes medical, hospital, and ambulance expenses, damage to clothing, etc.

SECTION C. AMOUNT OF COMPENSATION PAID

The total amount of compensation paid under the Workers' Compensation Act in each of the last six years is shown in Table 14 on page 19. The compensation paid in a particular year includes payments in respect of some cases first reported in earlier years and excludes payments yet to be made on claims not finalised by the end of the year; accordingly, the compensation payments during a year cannot be related to the new compensation cases reported in that year. Amounts shown on page 19 are gross payments - payments recovered by insurers during the year (e.g. as a result of damages awarded to a worker under motor vehicle third-party insurance) have not been deducted. Payments recovered by insurers during 1980-81 totalled \$7,865,303.

Self-insurers paid \$41,422,941 (12 per cent of the total compensation payments in 1980-81), and licensed insurers paid \$307,338,022 (88 per cent).

Particulars of the compensation paid during 1980-81 in cases where the injury sustained resulted in death or incapacity for three or more days are given in Table 15 on page 19.

TABLE 14. TOTAL COMPENSATION PAID (a), 1975-76 TO 1980-81

Year ended 30 June	For death or incapacity of three days or more	For incapacity of less than three days	Minor injuries (b)	Total
	\$	\$	\$	\$
1976	120,439,519	2,028,908	1,748,035	124,216,462

PART II - DETAILED TABLES OF STATISTICS

TABLE I - COMPENSATION PAID (a) DURING 1980-81 IN RESPECT

OF CASES OF INJURY ON DAILY OR OTHER PERIODIC JOURNEYS

Particulars	Amounts paid \$
MALES	
Compensation in respect of -	
Workers and dependants	16,706,565
Medical treatment	2,241,938
Hospital and ambulance	3,104,414
Damage to clothing, etc.	27,700
Total	22,080,617
FEMALES	
Compensation in respect of -	
Workers and dependants	8,754,690
Medical treatment	1,291,999
Hospital and ambulance	996,50
Damage to clothing, etc.	41,404
Total	11,084,596
PERSONS	
Compensation in respect of -	
Workers and dependants	25,461,25
Medical treatment	3,533,93
Hospital and ambulance	4,100,92
Damage to clothing, etc.	69,10
Total	33,165,21

⁽a) Excludes compensation paid in respect of cases of less than three days' incapacity.
